NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. The amount to be paid was determined to be £37,686 per annum; this to be in addition to 4,166,220 okes of Salt to be paid in kind.

The sum of £113 11s. 3d. per annum also became payable, under the same Annex, since the 4th September, 1884, when the Cyprus Government took over the administration of the Lighthouse Service in the Island. This sum represents 22% of the receipts of the Ottoman Lighthouse Administration which the Sublime Porte enjoyed under the concession granted the Company for lighting the Coast of Cyprus.

By a further Agreement of 3rd February, 1879, a further sum of £5,000 was to be paid annually to the Porte in respect of the produce of State lands

(a) Rocky uncultivable land and cultivable land.

(b) Forests.

\* NOTE.—When the area of the Island includes any large body of water, this should be clearly stated. The area of water should, if possible, be given separately.

## 3.—FISHERIES.

Catch of Fish			Number of boats and persons engaged in fishing	General Information regarding the industry and the possibilities of its development
Kind of Fish	Quantity	Landed value	Number of boats engaged in fishing	<p>In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats have certainly increased of late years but there is still plenty of room for improvement. Two Italian sailing trawlers did good work during the summer and autumn months at Larnaca and Limassol and demonstrated the practicability of increasing the production of this very valuable article of diet by more up to date methods than those practised by Cypriots.</p> <p>The sponge fishing has since the year 1903 been entirely under the control of the Government. The fishing in the past has been principally carried on by fishermen from the Greek Islands who arrive in the Island in the spring and fish through the summer, areas being allotted to them by the Inspector of Fisheries on payment of a fishing license; 20 or 25 per cent. of the catch (in kind) being also paid to Government.</p> <p>Thus :—</p> <p>Naked diving and Harpoons ... 20 per cent. Machine diving apparatus ... 25 ..</p> <p>In 1924, 2 Cyprus Harpoon Boats and 13 Machine Boats from the Greek Islands worked from May to October; the total catch being 3,994 okes good sponges and 198 okes skarta; the Government share was 987<math>\frac{2}{7}</math> okes good sponges and 48<math>\frac{2}{3}</math> okes skarta.</p>

(*a*) Some small factories are not included in this return.

(*b*) Primitive kilns, of which no details are available, are also found in certain localities.

(*c*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.

There are also a large number of primitive oil mills (with an output of over one million okes) and primitive rope making establishments of which particulars are unobtainable.

## 7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

---

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Island during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Island.

---

Cyprus is essentially an agricultural rather than an industrial country. Development has been considerable in the following industries: mining (especially copper pyrites, chrome and amber), wine and spirit making, fruit preserving, flax, cotton, silk, leather-curing and gypsum. Animal breeding, especially of horses, cattle, pigs, mules and donkeys, is progressing satisfactorily.

Re-forestation under the Forest Department is being pushed forward rapidly.

The importation of mechanical tractors, agricultural machinery and chemical manures is increasing.

Cyprus-grown tobacco is now finding a market on the Continent and experiments are being made to cultivate the Latakia variety.

A small boat-building yard is in operation at Famagusta.

Among minor industries, bee keeping on modern methods is developing. The Cyprus bee is noted for its value in the apiary.

Activity continues to be shown in the industry of weaving. A great variety of silk and cotton fabric of excellent quality is manufactured and finds a ready sale in both European and local markets notwithstanding the fact that the manufacture is conducted in a primitive method by the means of hand looms which are made locally. A modern silk-filature has been erected by Government.

Furniture making and shoe making have progressed considerably.

The art of embroidering is also well advanced, a great number of women and girls are engaged on needlework and lace-making. The latter is in wide demand abroad.

No Government grants for the development of industries have been made during the year.
